

Making Data Discoverable: Connecting Omni to Dataverse and Beyond

OCUL Collaborative Futures Mini Conference
June 5th, 2023

Wei Zhang, MLIS - E-Resources and Collection Analysis Librarian
Danica Evering, MA - Research Data Management Specialist
McMaster University Library

McMaster University is located on the traditional Territories of the Mississauga and Haudenosaunee Nations, and within the lands protected by the “Dish With One Spoon” wampum agreement.

Connecting Dataverse to Omni – a small act with a big impact!

- **Sharing research data:** how, why, where?
- **Libraries support discovery and reuse!**
- **Connecting Dataverse to Omni –**
Historical Context and Indexing
- **Practical Steps**
- **Big Impact!**

Go to www.menti.com and use the code 9499 3784

What is your familiarity with data sharing or data repositories?

0%

I know about it and have shared data!

0%

Our library has one but I'm curious to learn more.

0%

I've heard of data sharing but not sure about repositories.

0%

This is a new concept to me entirely!

How do researchers share data?

MISSING DATA

As research articles age, the odds of their raw data being extant drop dramatically.

How do researchers share data?

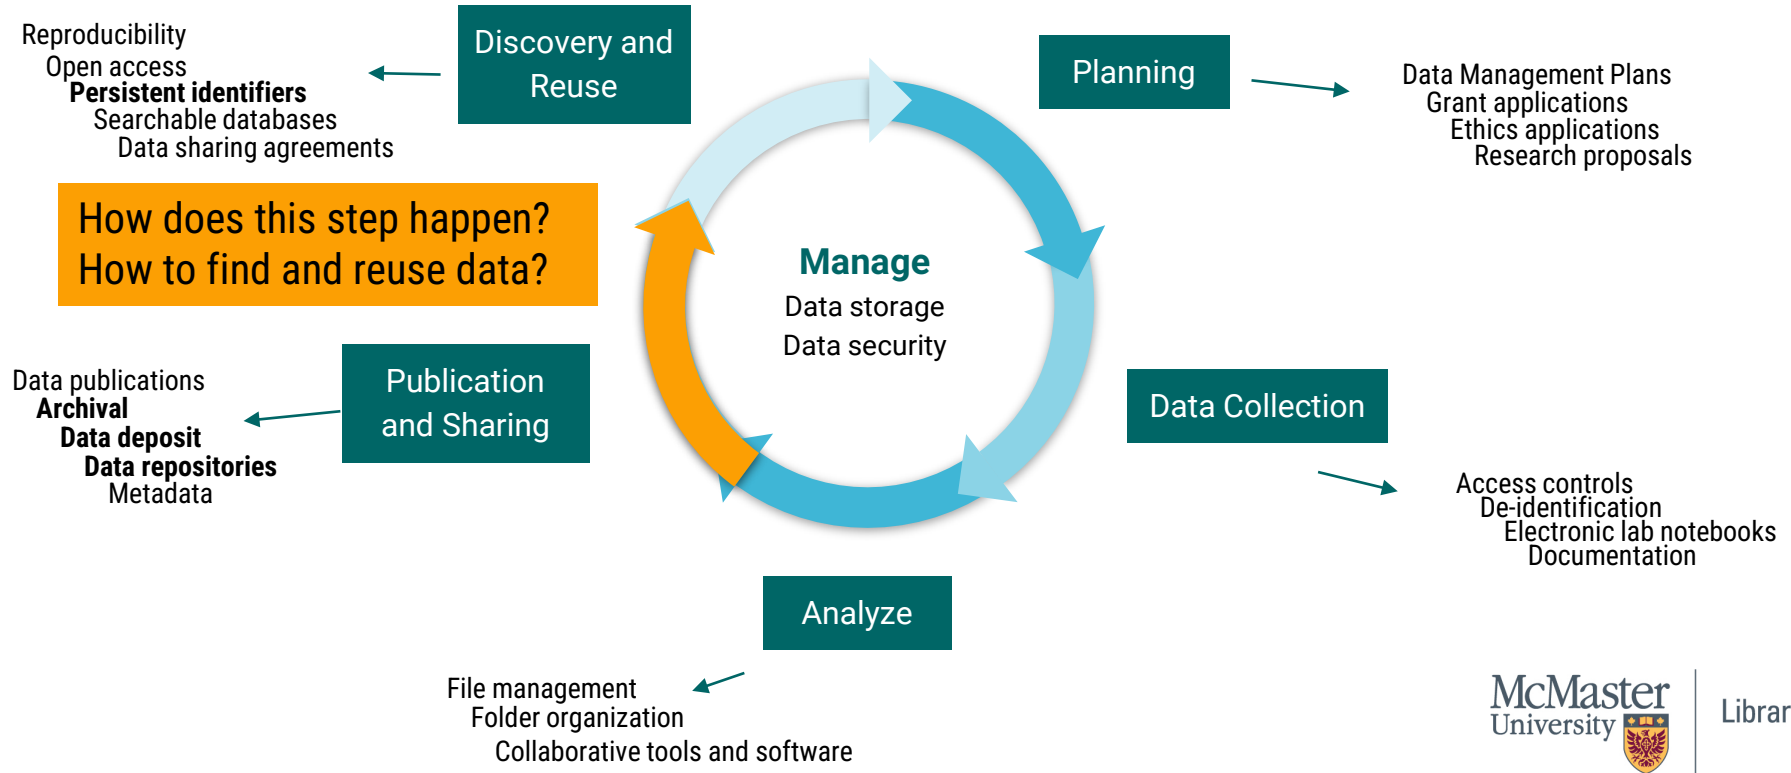

McMaster Dataverse – Institutional Data Repository

<https://borealisdata.ca/dataverse/mcmaster>

- Part of Borealis – the Canadian Dataverse Repository
- Open-source software out of Harvard
- Partnership between regional library consortia, research orgs, and the Digital Research Alliance of Canada
- Infrastructure – managed by Scholars Portal and University of Toronto Libraries

The screenshot shows the McMaster University Dataverse website. At the top, there's a navigation bar with the Borealis logo, search, user guide, support, language, and login options. Below this, the McMaster University logo is prominently displayed. The main content area includes links to the McMaster University Dataverse and McMaster RDM Services. A section titled 'About Dataverse' explains that it is a research data repository for faculty, students, and staff, held on Canadian servers. It provides information on research data management and links to the Research Data Management website. A list of bullet points advises users to look through the Data Deposit Guidelines before depositing data and to click a link for a full walkthrough. A contact email (rdm@mcmaster.ca) is provided for assistance. A search bar is present with a search button and an 'Advanced Search' link. On the left, there are filters for 'Dataverses (19)', 'Datasets (64)', and 'Files (783)'. Below these, a 'Dataverse Category' list shows 'Laboratory Project (5)', 'Laboratory (3)', 'Teaching Course (2)', 'Journal (1)', and 'Organization or Institution (1)'. The main results area shows '1 to 10 of 83 Results'. The first result is 'Long-term Rocky Tidal Community Data from Discovery Bay, Jamaica' by Jurek, Kolesa, dated Jun 30, 2022. The second result is 'Nurr1 is not an essential regulator of BDNF in mouse cortical neurons' dated May 30, 2022.

Context: Canadian Open Research Data in ProQuest

- 2021 - UBC Library Research Commons worked with ProQuest
- Collaboration: Eugene Barsky, Kelly Stathis, and Alex Garnett
- Datasets indexed by the Federated Research Data Repository (FRDR) become findable in ProQuest Central Discovery Index (CDI)
- Collaboration Records from FRDR become visible in Summon, Primo, Alma, Omni.

Long-term Rocky Tidal Community Data from Discovery Bay, Jamaica

Publication date: 2022-06-30

Source Repository: [McMaster University Dataverse](#)

Author(s): [Jurek, Kolasa](#)

Description: The rocky supratidal zone is home to a wide diversity of life. Understanding how individual species persist, the interactions between species in a community, and how the abiotic environment can shape these interactions requires detailed study. Over nearly three decades, Professor Jurek Kolasa and his research team have monitored meta-community dynamics in some 50 rock (supratidal) pools along the shores of Jamaica, collecting abundance information for 78 rock pool species, as well as abiotic measurements (temperature, salinity, pH, chlorophyll, dissolved oxygen, depth, volume). These data represent one of the most intensive meta-community monitoring projects ever conducted, making them of considerable value to our understanding of tropical coastal community dynamics.

Description

Provided by the Digital Research Alliance of Canada, the Federated Research Data Repository (FRDR) is a system for researchers in Canada to deposit and share research data and to facilitate discovery of research data through federated searching across over 100 Canadian research data repositories. Anyone can use FRDR to search for and download data, and researchers can use FRDR as a robust repository option into which large research datasets can be ingested, curated, processed for preservation, discovered, cited, and shared.

Allowable Uses:

Access is available to everyone, anywhere.

Description:

Borealis, the Canadian Dataverse Repository, is a bilingual, multi-disciplinary, secure, Canadian research data repository, supported by academic libraries and research institutions across Canada. Borealis supports open discovery, management, sharing, and preservation of Canadian research data.

Borealis is available to researchers who are affiliated with a participating Canadian university or research organization and their collaborators. Borealis is a shared service provided in partnership with Canadian regional academic library consortia.
